Actual material cost savings from a QuickPouch Vertical user.

6 inch by 9 inch pouch, Tyvek® / PET peelable pouch, 500,000 pouches per year.

Besides the savings involved with forming pouches from rollstock, this customer was able to replace expensive labels with less expensive and more efficient inline printing on the QuickPouch Vertical. These cost savings only reflect savings in material costs and do not include labor savings which can be significant as well.*

Pre-Made

\$0.21 per pouch

QuickPouch

\$0.07 per pouch

Savings

\$0.14 per pouch

66% Savings, or \$70,000 per year.

You could save even more.

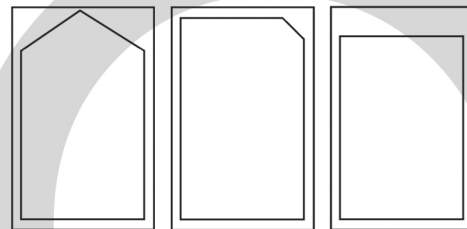

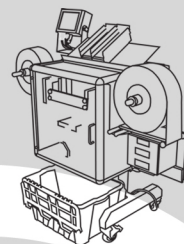

*These numbers are for demonstration purposes only.
Material cost savings are dependent on a number of factors including pouch size, pouch quantities, and current packaging process.
